-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Mosby. This patent shows a wet grinder including a stirrer with apertured wheels in a chamber.

Each of the wheels has projections on opposing surfaces.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mosby in view of Pujol. The apertures of Mosby are not inclined thus limiting fluid movement. Pujol solves this problem by disclosing similar apparatus including the use of inclined apertures. In order to increase fluid movement, it would have been obvious for one of ordinary skill in the art to modify Mosby by inclining the apertures, taught to be desirable by Pujol.

Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mosby as applied to claim 1 above, and further in view of Godinez. Mosby's wheels are

welded to the shaft which creates maintenance problems. Godinez avoids these problems by using spacers to separate wheels in a similar apparatus. In order to reduce maintenance costs, it would have been obvious for one of ordinary skill in the art to modify Mosby by providing spacers to separate the wheels, taught to be desirable by Godinez. The exact manner for fixing the spacers would have been a design choice only once their use was known.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Rosenbaum whose telephone number is 571-272-4523. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alan Ostrager can be reached on 571-272-4521. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
